

Push
palletizers

WATCH VIDEO

PPAL palletizers: speedy, heavy-duty and stable.

PAYPER is one of Europe's leading manufacturers of complete bagging lines. Push palletizers are very fast, allowing high production capacities. In addition to creating fully square pallets with high stability: the front and side pusher system forms the layers at right angles; then, for extra stability, each layer is compressed against the previous layer. Push palletizers are highly flexible, allowing adaptation to different layer patterns, and are particularly suitable for valve bags and FFS bags.

THE PUSH PALLETIZER
REACHES SPEEDS OF

2,800
BAGS/HOUR

ACCURATE WEIGHING SYSTEM

INTUITIVE CONFIGURATION

EASY ACCESS AND MAINTENANCE

HEAVY-DUTY DESIGN

OPTIONS

EXTRA STABILITY

With a **bag gluing** system or the use of **anti-slip sheets** between layers.

SPECIAL ANTI-CORROSION CONFIGURATION

PAYPER has a special configuration for **corrosive products**.

AVOID BREAKAGES AND MOISTURE

For greater automation, the robot can place a **cardboard or plastic sheet** on an empty pallet.

PALLET LESS SYSTEMS

With or without slip-sheets. For a more **lightweight system and more storage** space.
